

Ultra•PRO®

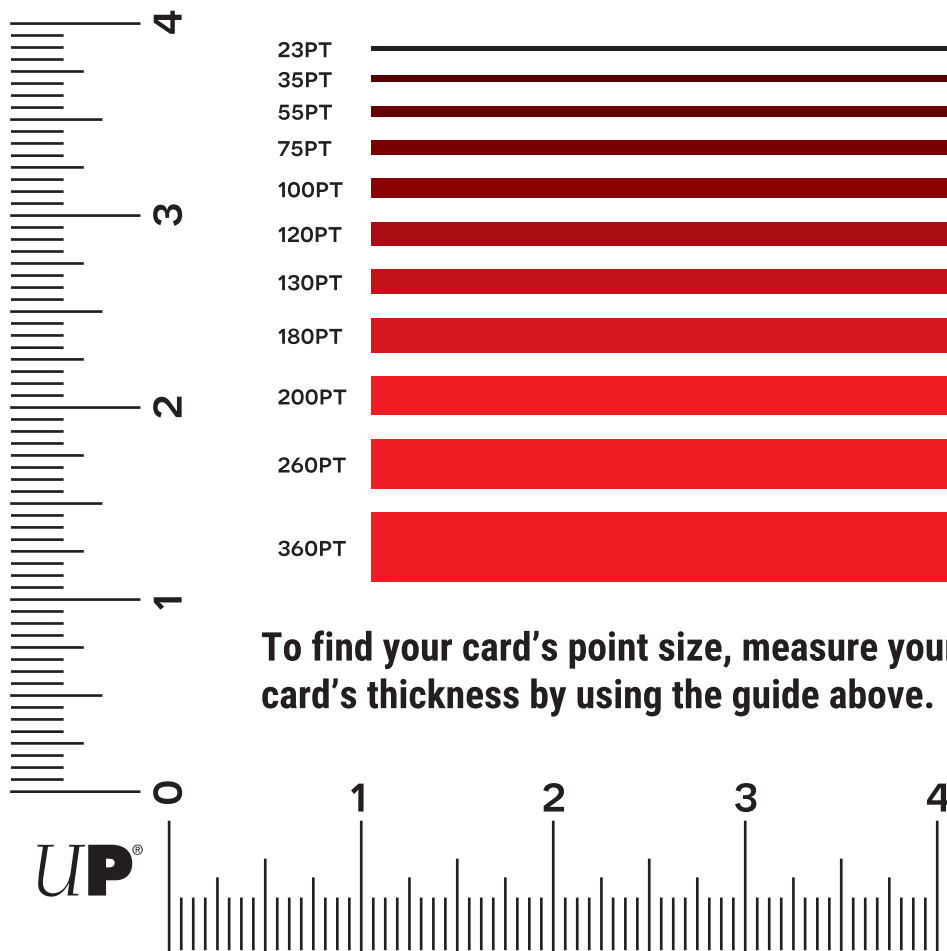

Today's sports trading cards come in a variety of different thicknesses (depth or caliper).

We've created this guide to help you determine the thickness of your card and to better select the appropriate Ultra PRO product to display and protect your card.

Included on this guide are rulers to ensure that when printed it is calibrated correctly. Use your ruler to compare on the printed ruler to make sure it is printed correctly (1 to 1).

CARD THICKNESS POINT GAUGE

1,000 POINTS = 1 IN. = 25.4 MM

To find your card's point size, measure your card's thickness by using the guide above.
